

It's time for a new, updated cyclone\_hk wordlist.

"cyclone\_hk\_v2" aka "V2" supersedes "cyclone\_hk" as V2 includes all the plains from the original cyclone\_hk.

V2 has been compiled from dozens of public wordlists / leaks such as hashkiller (jan 2020), hashes.org (2020), crackstation, facebook names, weakpass, etc, and now includes over 2.5GB of plains from Hashmob.

V2 has been compiled, cleaned, deduped and sorted by probability.

Please test V2 and report your findings.

All credits go to the original wordlist creators.

Enjoy,

~cyclone

#####

Testing:

Test set is a combination of 50% plains from several dozen sources (dubsmash, stockx, poshmark, etc) + 50% mangled plains using various cyclone.rules.

All plains are 9+ char len and include at least 1 upper, lower & digit.

Test set was narrowed down from 100M to 1M by the following command:

Code:

```
shuf test_100m.txt | rg '[a-zA-Z0-9]{9,}' | head -n 1000000 > test_plains.txt
```

Test set md5 hashes: [https://anonfiles.com/Gca9pb16y6/test\\_md5\\_hash\\_7z](https://anonfiles.com/Gca9pb16y6/test_md5_hash_7z)

Test set plains: [https://anonfiles.com/y9a9pb14y4/test\\_plains\\_7z](https://anonfiles.com/y9a9pb14y4/test_plains_7z)

Results:

wordlist	Rules	%
hashkiller (jan2020)		29.65%
hashkiller (jan2020)	cyclone_250.rule	38.22%
hashkiller (jan2020)	cyclone_1500.rule	43.69%
cyclone_hk.txt		43.93%
hashes.org (combined)		45.00%
cyclone_hk.txt	cyclone_250.rule	47.47%
cyclone_hk_v2.txt		48.17%
hashes.org (combined)	cyclone_250.rule	48.85%
cyclone.txt		49.82%
cyclone_hk_v2.txt	cyclone_250.rule	50.62%
cyclone.txt	cyclone_250.rule	52.61%
cyclone_hk.txt	cyclone_1500.rule	52.84%
